

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Heyl

HEYL is an independent, entrepreneurial family business that has its headquarters in probably the liveliest German metropolis, Berlin, since its establishment in 1926. In cooperation with our international subsidiaries, the main focuses of our work are the Regulatory Affairs and marketing of medicines as well as the sale of active pharmaceutical ingredients (API's) and special chemicals.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Drugs

Drugs

Heyl offers with its 5 business areas Antidotes, Antirheumatics, Anti-biotics, Cod-liver oil preparation and Vitamins a wide range of products. Especially in the business area Antidotes we developed a number of antidotes in cooperation with national and international research institutes and universities. These are highly effective drugs which are used against poisonings by thallium, arsenic, heavy metals (mercury, lead) or by radioactive isotopes like radiocesium or plutonium. Demands from all continents of the world show the uniqueness and medical significance of these drugs.

Are you interested in our products? Then pick a Heyl product from the list above to get detailed information (e.g. material safety data sheets) about its properties and applications.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Antidotes

The antidotes form our most important product group (poisoning remedies). They increase the elimination of toxic heavy metals or radionuclides through the urine or stool. These highly effective drugs are used against poisonings by thallium, arsenic, heavy metals (mercury, lead) or by radioactive isotopes like radiocesium. Antidotes are also the drugs of choice for genetic diseases like Wilson's disease, a hereditary copper storage disease.

The used active pharmaceutical ingredients (APIs) are produced predominantly according to strict quality guidelines in Apolda, Germany. Demands from all continents of the world show the uniqueness and medical significance of these drugs.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Antirheumatics

HEYL can look back at very long-standing experience in the area of the antirheumatics - the foundation product of the company was Polyphlogin®, at that time a very common antirheumatic. In 1955 HEYL was the first company in Germany that succeeded in the production of D-Penicillamine, which is still used today for special cases in the therapy for rheumatoid arthritis. Meanwhile the rheumatic sector has been enlarged by the introduction of a generic Sulfasalazine drug.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Antibiotics

Antibiotics have been the interest of HEYL for a long time. Today HEYL is the only company in Germany that still offers the sulfonamide Sulfadiazine for the therapy of Toxoplasmosis.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Cod-liver oil preparation

Unguentolan® is a cod-liver oil ointment developed in 1932 for wounds and burns. It has a more than 70-year old tradition in supporting the healing of wounds. Decades of experience and reports of users demonstrate how Unguentolan® is proving to support wound healing successfully again and again.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Vitamins

We have developed numerous vitamin concentrates which are sold under the trademark Vicotrat® (vitamin concentrate). Today we are the exclusive supplier in Germany of vitamin D3 as injection solutions. Also belonging to this group is the vitamin B6, an oral preparation, which in its high dosage is also offered exclusively by us.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Chemistry

Our activities in the chemistry sector cover three areas:

Special Chemicals, Active Pharmaceutical Ingredients (APIs)
Reagents for Analyses
Industrial Chemicals

The synthesis of different chemicals like active pharmaceutical ingredients (APIs), substances for liquid crystals as well as special, industry and analysis chemicals is carried out at our subsidiary, Laborchemie Apolda GmbH. In the following list the compounds which have recently found a special interest are specified. They are deliverable in package sizes according to your wish.

Furthermore the general-purpose plants of Laborchemie Apolda GmbH also make possible the production of other organic and inorganic products according to your specifications. We would be pleased to provide you with further information. Please contact us or our subsidiary Laborchemie Apolda.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Antidotes

Immediately Dimaval® can be ordered in all package sizes and forms of administration again!

In addition, a new monograph about Dimaval is available.
You find details at the product information to Dimaval.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Profile

Profile

HEYL Chemisch-pharmazeutische Fabrik GmbH & Co. KG is an independent, entrepreneurial family business that has its headquarters in probably the liveliest German metropolis, Berlin, since its establishment in 1926. In cooperation with our international subsidiaries, the main focuses of our work are the Regulatory Affairs and marketing of medicines as well as the sale of active pharmaceutical ingredients (API's) and special chemicals.

We concentrate our strengths on special areas and niches. A number of antidotes were developed in cooperation with national and international research institutes and universities. These are highly effective drugs which are used against poisonings by thallium, arsenic, heavy metals (mercury, lead) or by radioactive isotopes like radiocesium or plutonium. Demands from all continents of the world show the uniqueness and medical significance of these drugs.

The active pharmaceutical ingredients (API's) of the antidotes are produced predominantly by Laborchemie Apolda GmbH, our subsidiary firm in Thuringia, according to current quality rules. We are represented in important foreign markets like USA and Japan by our subsidiaries (Heyltex Corporation in Houston, Texas and Heyl Japan & Co. Ltd. in Tokyo). In Berlin, the German and international headquarters join long-standing marketing competence together with medical scientific know-how in five main strategic business fields: antidotes, anti-rheumatics, antibiotics, cod-liver oil preparation and vitamins.

Management and colleagues use their strength to claim our competitiveness by competence and price restraint in the local German market. We want to meet the expectations of our customers and do justice to our responsibility with respect to the families of our colleagues and future capital investors.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Motivation

- We want to arrange our life in a liberal, social order independent
- and responsibly successful.

- Our existence in the international marketplace is based on the
- unique selling position of our products and performance.

- We want to be an easily-accessed and reliable partner to
- our customers.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Mission

- By 2010 we want to become the leading enterprise worldwide
- for antidotes against poisonings with heavy metals and radio
- nuclides.

- As a niche specialist we concentrate on products which are too
- small for large-scale enterprises and too demanding for smaller
- enterprises. We apply our competence to high-grade chemical
- syntheses.

- We create value for customers, owners and employees.

- We act socially and ethically responsible.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

Our Values

- We stand for excellent quality.
- We feel obliged to medical progress; the development,
• production as well as the marketing of first-class therapeutics.
- We are customer oriented, i.e. the customer is the center
• point for us.
- We economize lastingly and socially responsible.
- We feel enthusiastic about our business.
- We take on responsibility and lead by example.
- We set clear goals, delegate decision-making power and
• responsibility and encourage an open feedback.
- We are successful because of our employees, i.e. we promote
• a further personal development and support work in teams.
- Openness, sincerity and absolute information exchange
• determine our behavior.
- We promote initiative, learn from faults and strive for
• top performance.
- We keep the tradition of an open family business.

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

History

1734

In 1734 Jacob Friedrich Heyl founded a material goods shop in old Berlin.

1765

From this our direct ancestor, Johann Friedrich Heyl, created the paint factory and chemical wholesaler, J.F. Heyl & Cie, Berlin in 1765, from which in 1833, by Ernst Eduard Heyl, a new factory was diverged in Berlin-Charlottenburg, Salzufer. This developed into an important enterprise in the field of artist paints.

1926

The foundation of today's company, Heyl Chemisch-pharmazeutische Fabrik, took place on the 16th of December, 1926 by Werner Heyl, M.D. The main fields of activity were the extraction and processing of cod-liver oil according to their own patented methods as well as the new vitamin preparations of that time.

1945

With the end of World War II the Heyl production plants situated in East Berlin and abroad were completely destroyed or expropriated. Nevertheless, Heyl was the first German company to succeed in the filling of vitamin B12 and the antibiotic Streptomycin after the war.

1960

Since 1960 its headquarters can be found on Goerzallee 253 in Berlin-Zehlendorf. Here the development of D-Penicillamine, among others, was carried out for the treatment of Wilson's disease and as a standard therapeutic agent against chronic rheumatoid arthritis.

1979

Chemisch-pharmazeutische Fabrik
GmbH & Co. KG

The foundation of foreign offices followed: in 1979 Heyltex Corporation was founded in Texas, USA and Heyl Japan Co. Ltd. in Tokyo, Japan in 1983.

1993

To improve our production possibilities in the field of chemical synthesis, Laborchemie Apolda GmbH was privatized in 1993 and was taken over as a 100 percent subsidiary of the Heyl Chemisch-pharmazeutische Fabrik GmbH & Co. KG.
